IMT tokens can be purchased during the token sale for \$0.005.

After the token sale, any IMT tokens that users spend within the platform will be transferred to the retail fund and re-circulated for retail sale from the platform at \$0.05.

The retail price of the IMT's offered for sale on the platform will be set at x10 times the price offered during the token sale; therefore the token sale provides an opportunity to buy IMT tokens at a substantial discount compared to the retail sale price of IMT on the operational Moneytoken platform.

Note: The retail sale is an opportunity to buy IMT tokens and use them within the platform to new users who haven't participated in the token sale; it does not imply that the platform will buy back tokens from holders at the x10 price after the sale is completed.

The funds received from the Retail sale will be transferred to the Safety Fund as a security for lenders. The Safety fund mechanism is explained in detail in the Whitepaper.

We will return funds if the soft cap is not reached. All unsold tokens will be burned.
